Ubiquitous Communications and Network Computing (UBICNET) are revolutionary concept that aim to provide pervasive and reliable communication and computing services available anytime and anywhere. UBIUNET has drawn significant interests from both academia and industry and continues to attract tremendous research efforts due to its promising new business opportunity in information technology and engineering.

WORKSHOP/TUTORIAL/SPECIAL SESSION ALSO INVITED

Topic of Interest for discussion but not limited to:

Advanced Communications
Next Generation Networks
Wireless Access Technologies
Network Sensing & Applications
Heterogeneous Networks
Cognitive Radio
Software Defined Networks
Virtualization
Soft Computing
Mobile User Interface and Integration Technologies
Energy Aware Mobile Computing
Mobile Cloud Computing
Smart and Intelligent Devices
Network Computing
Distributed Computing
Internet of Things
Systems, Data Analytics & Applications
Wearable Computing
Body Area Networks
Security and Privacy

HIGHLIGHTS

- All accepted papers will be published by Springer LNICST. Proceedings will be available to the leading indexing services: EI, ISI Thomson's Scientific and Technical Proceedings at Web of Science, Scopus, CrossRef, Google Scholar, DBLP, as well as EAI's own EU Digital Library (EUDL).
- Accepted authors will be invited to submit an extended version of their work through one of the following EAI endorsed publications: EAI Endorsed Transactions on Cognitive Communications
- Please see the proceedings of previous edition of UBIUNET 17: <http://archive.ubicnet.org/2017/show/home>
